PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience turning ERP and legacy data into dashboards and automations that support cost, payment and production decisions at Toyota, Bosch and AC Metais. Consolidated 163 supplier files into a cost reduction dashboard, standardized and automated the payment flow for tooling, services and investments to protect cash flow, and cut material lookup time by 60% and scrap by 15% with Power BI. Works daily in English with international teams in Japan, Thailand and the United States. Completed the Microsoft Power BI Data Analyst Professional Certificate course, covering DAX, star schema data modeling and PL-300 preparation. Mechanical Engineering student graduating in December 2026 and EU citizen, available in Lisbon from February 2027.

TECHNICAL SKILLS

BI & Analytics: Power BI, DAX, Power Query, Data Modeling (Star Schema), Microsoft Excel, Data Visualization
Languages: SQL, Python (PySpark), VBA, C++
Data Engineering: ETL/ELT, Data Pipelines, Incremental Ingestion, Lakehouse Architecture, Data Quality Testing (dbt), Data Governance, ERP Data Migration
Cloud & Big Data: Microsoft Fabric (Lakehouse, OneLake), Microsoft Azure, Delta Lake, dbt
Databases: PostgreSQL, Microsoft SQL Server, MySQL, SQLite
Tools: Git, GitHub, Docker, VS Code
Business Systems: SAP ERP, Salesforce, OutSystems

PROFESSIONAL EXPERIENCE

Data & BI Intern (Purchasing) | Feb 2025 - Present
Toyota do Brasil | Sorocaba, Brazil

- Consolidated 163 supplier files into a cost reduction dashboard, replacing days of monthly manual work with a single refresh.
- Automated PR/PO creation in SAP ERP with Python and VBA, reducing purchasing processing time from 3-6 hours to under 5 minutes (over 95% faster); selected as a top 3 Toyota Business Practices project and presented to the board and presidency.
- Replaced a 30-spreadsheet reporting routine with one Power BI view.
- Delivered weekly executive Power BI dashboards tracking Engineering Change (ECI) design modifications, fed by Python and SQL extractions from the legacy SIQ system.
- Standardized databases and data workflows for the TOIOS-to-SAP ERP migration across the TLAC region (Brazil and Argentina).
- Aligned global purchasing data and procedures with teams in Japan and Thailand, working fully in English.

Project Management Intern | Oct 2023 - Jan 2025
Bosch do Brasil | Sorocaba, Brazil

- Managed quotation-to-SOP project lifecycles for Mercedes-Benz product lines (Accelo and LO Farm), tracking milestones in SAP ERP with cross-functional teams.
- Built Power BI dashboards for real-time prototype stock visibility, automating data ingestion with Python email-parsing scripts.
- Contributed to a QR-code based prototype inventory solution that cut inventory losses and part movement rework by about 60%.
- Coordinated requirements and deliverables in English with international partners, including US teams on autonomous technology initiatives.

BI Analyst | Oct 2022 - Oct 2023
AC Metais do Brasil | Sorocaba, Brazil

- Built Power BI dashboards integrated with the Kiron ERP, reducing sheet metal lookup time by 60% and scrap by 15%.

- Structured raw material data ingestion with the Production Planning and Control (PPC) team to track daily output, yield rates and inventory movements.

SELECTED DATA PROJECTS

Industrial Data Platform | github.com/lucasnunesf/industrial-data-platform
Microsoft Fabric · PySpark · Delta Lake · dbt · Apache Airflow · PostgreSQL · Docker · Power BI
In progress, MVP Dec 2026. Recreation of a real data platform project I supported in 2026, based on the real operation of AC Metais (used with the owner's permission). Synthetic ERP and machine data is ingested incrementally into a Microsoft Fabric lakehouse, processed through bronze and silver layers with PySpark, modeled and tested with dbt, and served to Power BI for lead time, bottleneck, OEE and margin analysis.

Payments Postponed - Toyota Business Practices project | github.com/lucasnunesf/sap-automation
Python · VBA · SAP GUI
Standardized and automated the payment flow for tooling, services and investments in Purchasing, eliminating postponed payments that caused contract amendments and lost investment budget within the month. Selected among the top 3 projects of the 2026 internship programme and presented to the board and presidency. Public version uses synthetic data.

EDUCATION

Bachelor's Degree in Mechanical Engineering | 2022 - 2026
FACENS | Sorocaba, Brazil

Technical Degree in Business Intelligence and Administration | 2020 - 2022
ETEC | Tatuí, Brazil

CERTIFICATES & TRAINING

- Microsoft Power BI Data Analyst - Professional Certificate, Microsoft via Coursera (2026): 8 courses covering Power Query ETL, star schema data modeling, DAX and PL-300 exam preparation
- Microsoft Fabric Analytics Engineer (DP-600) - exam scheduled for December 21, 2026
- IBM Data Engineering - Professional Certificate, IBM via Coursera (2026)
- English Certificate, CEFR B2, EF Education First

ENGINEERING PROJECTS & LEADERSHIP

Omegabotz Combat Robotics Team, FACENS | Jan 2023 - Aug 2025
- Led design and assembly of combat robots, programming microcontroller and motor control logic in C++ and analyzing real-time telemetry data; won 2nd place at an international championship in Greece.

SAE Formula/Baja Team, FACENS | Aug 2024 - Aug 2025
- Developed electronic data acquisition routines and analyzed real-time sensor data to optimize vehicle handling and prevent component failure.

Falcons Aerodesign Team, FACENS | Jan 2026 - Present
- Coordinate schedules, deliverables and technical documentation across automation and electrical sub-teams, ensuring telemetry sensor integration.

LANGUAGES

Portuguese: Native | **English:** Professional working proficiency (CEFR B2)
